MPL Prerequisites

Aim: Selecting features for application development, the features should comprise of:
● Common widgets
● Should include icons, images, charts etc.
● Should have an interactive Form
● Should apply navigation, routing and gestures
● Should connect with FireBase database

| No.	Screenshot	Features
1.		**Landing Page :** Login page if already registered. If not, sign in using your email address/phone number. Firebase for authentication Additional information: gender and birthdate is asked. **Firebase :** User : email and password, mobile number, gender, birthdate

| 2.		User Homepage : ● **Icons** including cart, search, wishlist, categories, membership and profile. ● **Top navbar** includes men, women, kids for different customers. ● **Bottom navbar** leads us to other pages like wishlist, categories and our profile. ● **Sidebar** includes all the categories. ● **Widgets** include new arrivals and the trending apparel of the week. Firebase: ● Manages the product catalog, user authentication, order history, addresses, and real-time order tracking to support fast delivery services.
3.		Categories Page: ● All the categories under the respective gender are displayed on the left. ● The sub-categories are displayed on the right. ● For each bar, the name of the category along with the representative icon is displayed. Firebase: ● Manages extensive product categorization system, maintaining the product catalog across all categories shown, each with their subcategories.

4.		**Specific Category Page:** ● For common widgets, the page displays several UI components: product images, price of the product, and a button to add the product to the wishlist. ● There are two options below: filter and sort. **Firebase:** ● Manages product inventory, including pricing, stock availability, descriptions, and real-time updates for filtering and sorting options.
5.		**Wishlist and Cart:** ● Wishlist displays the product image, name and MRP and a "Move to Cart" option. ● The cart page displays a cart summary with product images and details, quantity adjusters, size selectors, price displays showing both MRP and discounted prices, product recommendations and a prominent "Continue" button. ● There is an option for moving items back to the wishlist. ● Delivery address is asked. ● Options for applying coupons are available. **Firebase:** Manages cart state and total calculations,product availability, price updates, delivery address validation, payment processing status, and order tracking.
